6.	FORMATS	7

1. SCOPE AND APPLICATION

Contractor/Service providers are the key stake holder and an integral part of Gujarat Gas Ltd (GGL's) business. Contractors'/Service provider' Quality, Health, Safety and Environment (QHSE) performance reflects on the company's business performance and reputation. GGL has established QHSE Management Systems, Procedures & Guidelines to ensure compliance with GGL's QHSE requirements. These requirements apply to all jobs whilst conducting work for GGL including; Project, Construction, Operation & Maintenance, Field Operations and Services within any given contract or agreement.

The overall objective of QHSE management in contract/agreement is to improve the company and Contractor's/Service providers' QHSE performance in all aspects of activities. Active and on-going participation by both the GGL and Contractor/Service provider is essential to achieve this objective.

2. RESPONSIBILITIES

It is responsibility of GGL management and staffs to ensure that all Contractors/Service providers work under their direction & control are provided with relevant Integrated Management System (IMS) Policies, Procedures & Guidelines that describe the GGL requirements for undertaking work within the company. It is also the responsibility of Contractors/Service providers to ensure that their staff are informed of and comply with GGL's requirement whilst working for the company.

GGL HSE department provides advice and assistance on QHSE requirements across the complete spectrum of all work activities. Contract Owner (Department Head) and Contract Holder (Work in-charge) are responsible to ensure safe execution of work/service include the following:

- Ensuring that the QHSE Policy, Procedures & Guidelines are known and understood by all contractors'/service providers' staff and work force
- Monitoring, Inspecting & Auditing execution of work, activities to ensure adherence to the QHSE compliance requirements

The Contractors'/Service provider' will take the responsibility for implementation of GGL's QHSE Policy, Procedures, Guidelines and other requirements with the advice and support of the GGL's Contract Owner / Contract Holder and HSE representative.

Contractor/Service provider to ensure that all aspects relating to QHSE are adequately addressed and implemented in accordance with the GGL QHSE requirements and QHSE Management Plan, which shall include the management processes and activities to be implemented during the course of work with GGL.

Contractor/Service provider shall be responsible for ensuring that adequate HSE resources are put in place to enable satisfactory implementation of QHSE Management Plan.

This responsibility also applies to ensure the Health and Safety of the people are directly and indirectly engaged / involved whilst working or present at GGL's work area / sites.

3. MOBILIZATION

- Post selection and awarding of contract, GGL shall arrange a kick-off meeting with Contractor/Service provider where GGL team members Contract Owner (CO), Contract Holder (CH) & HSE representative) will discuss on QHSE Management aspects / plan and requirements in order to make sure that Contractor/Service provider and their team are fully understand the expectation of GGL. During the meeting, QHSE Management Plan shall be discussed and agreed between GGL and Contractor/Service provider.
- Contractor/Service Provider shall ensure that all tools, tackles, equipment, machineries & instruments are adequately deployed and are 'Fit for Purpose'. Pre mobilisation checks/inspection shall be carried out by GGL team for the same before the start of work.
- GGL emphasizes on the importance of the Health and Fitness of all staff/work force deployed at GGL work sites. Contractor/Service provider shall adhere to medical check-up as per the GGL Health check-up matrix (as applicable)
- A proper HSE orientation and training will be organised by GGL for the Contractor/Service provider workforce before the start of work; under no circumstances should the Contractor/Service provider commence the work unless they have undergone the HSE training (as applicable)
- Contractor/Service provider shall ensure that all their staff/work force are provided required Personal Protective Equipment (PPEs) as per GGL PPE matrix (as applicable)
- Contractor/Service Provider shall ensure all required emergency arrangements like Medical treatment, FIRST AID box and Fire fighting equipment (as applicable)

4. EXECUTION

Contractor/Service provider is responsible to ensure the compliance with GGL QHSE requirements. GGL overall QHSE performance is directly influenced by the contractors' performance.

- Contractor/Service provider is responsible for QHSE compliance monitoring at site/work activities to ensure that work/activity is performed in a safe manner. Moreover, they are responsible for reporting of all incidents, Hazard and Near Miss that might happen during work/activity
- Contractor/Service provider shall follow and comply with GGL "Work Permit" system
- During work execution and activities, GGL team will regularly monitor and evaluate the performance of the Contractor/Service provider to identify the shortfalls and weaknesses and assist to improve the overall performance including QHSE performance through CPAR process (as applicable)

We believe that everyone at GGL, Employees, Contractors, Service providers and Associates have the right to go home safely to their families.

QHSE Defaults and Penalties (As applicable)		
SN	Description	Penalty amount
1	Work without PtW/WA or Unauthorized Work	Rs. 3,000/- per instance
2	Non-compliance - Safety Training Card (STC)	Rs. 1,000/- per instance
3	Non-compliance - Health Check up	Rs. 2,500/- per instance
4	Non-compliance – PPEs	Rs. 1000/- per instance

Remark: Issuance of MEMO against HSE non compliances including above mentioned defaults shall be decided by Contract Holder

5. QHSE GUIDELINE (AS APPLICABLE) FOR ALL TYPE OF CONTRACTS

1. Contractor/Service provider
 - a) shall ensure that all staff/work force comply with the requirements of the GGL HSE Management System, QHSE policy, standard, procedures, guideline, plan & Life Savers at work site
 - b) shall ensure issuance of Identity Card to their team members
 - c) shall apply and obtain Permit to work (PtW/WA) before start of the work
 - d) shall arrange work related Personal Protective Equipment (PPEs) for their staff/work force and ensure proper use during the execution of job
 - e) shall carry out the work within the duty hours/office hours. No Work shall be carried out without permission of GGL's representative beyond the official duty hours unless otherwise agreed upon prior to start of work and recorded appropriately
 - f) shall ensure that all tools, tackles, appliances, machines, vehicles, instruments or other equipment are Fit for Purpose and maintained safe working condition at all times and are used only by authorized and competent persons
 - g) shall ensure that all the QHSE requirements are properly discussed for any sub-contracted activities with GGL. No such activity shall be performed without clearance from GGL management
 - h) shall ensure that all Hazards, Near miss, accident, incident, injuries are reported promptly to GGL. Action arises due to reported Hazards, Near miss, incident investigation; audit/inspection shall be closed out as per agreed timelines with site in-charge
 - i) shall deploy staff & work force trained, qualified and competent for the work and well aware of risks and mitigation action/s for the activities undertaken
 - j) shall make necessary arrangements for safe custody of equipment, materials in stores/warehouse and at site
 - k) shall ensure safe transportation, storage and handling of materials to prevent any damage which may impair safe performance of the equipment / material etc
 - l) shall initiate immediate actions to hospitalize injured person(s)
 - m) shall ensure an injury free, incident free workplace and protect people from harm caused by work activities
 - n) shall ensure use of seatbelts while driving four-wheeler and use of crash helmet for Two wheeler riders during job execution

- o) shall ensure Lock out and Tag out (LOTO) after de-energizing and double check before starting any jobs. In case of conducting job for the purpose of fault finding & monitoring of voltage & current it is to be considered live working and all PPE'S to be worn to avoid exposure of flash arc current
 - p) shall take note that the use of open wires in sockets, use of wires with tape joints shall not be accepted at work site.
 - q) shall ensure proper collection, storage and disposal of solid / liquid waste as per GGL procedure and guideline
 - r) staff/work force shall not smoke or resort to misuse of drugs, medicines or alcohol while on duty
2. In case of any incident like fire, gas leakage etc. due to gross negligence of the Contractor's staff/work force, GGL reserves the right to impose penalty up to actual damage cost and or termination of work order depending upon the gravity of the situation.
 3. Any breach of the QHSE requirements shall be deemed by the company to be a material breach of the terms & condition of the contract. GGL shall be entitled to take appropriate actions including instructing the contractor to (a) remedy the breach; (b) suspend the work or (c) terminate the contract.
 4. All activities shall be carried out as per GGL's documented procedures and QHSE requirements, deviation from it shall be dealt with very strictly

PENALTY MATRIX RELATED TO INJURY CASES

SN	PARAMETER	PENALTY (INR)
1	Fatal incident	For each fatal case either 1,00,000/- or 10 % of total contract value, whichever is lower
2	Lost time injury	For each injury case either 20,000/- or 5 % of total contract value, whichever is lower
3	Medical Treatment case / Restricted workday case (Excluding animal/insect bite cases)	For each injury case either 10,000/- or 2 % of total contract value, whichever is lower

Note: Penalty shall be imposed over and above the payment & compensation that would be made by the service provider to the injured person or family of deceased vide the statutory provisions.

WASTE MANAGEMENT MATRIX

Waste Management Matrix						
Waste item	Responsibility of collection	Storage Location	Responsibility of Storage & Disposal	Method of Disposal	Record to be maintained	
Hazardous Waste						
O&M Waste						
Used oil from Compressor / DG set	GGL EIC through contractor	CNG Station / CGS	Contractor	Disposed to SPCB authorised vendor	From-3, Form 4, Manifest	
Cotton Waste- Contaminated with Used oil		CNG Station / CGS	Contractor	Disposed at land fill sites		
Used Gas filter cartridge		GGL Store / Warehouse	GGL Warehouse – rep.	Disposed at land fill sites	Manifest	
Ethyl Mercaptan scrubber drums		CNG Station / CGS	Vendor	Disposed to SPCB authorised vendor	Manifest	
Used Suraksha hose		GGL Store / Warehouse	GGL Warehouse – rep.	Disposed at land fill sites	Manifest	
Condensate during pigging		Condensate tank at site	Contractor	Disposed to SPCB authorised vendor	Manifest	
Used Odorant Tank		GGL Store / Warehouse	GGL Warehouse – rep.	Disposed to SPCB authorised vendor	Manifest	
Project Waste						
Used Welding Electrodes	GGL Site In-charge through contractor	Respective Contractor store		Disposed to SPCB authorized vendor	Manifest	
Equipment-Used Oil				Disposed to SPCB authorised vendor		
Coating / Chemical cans				Disposed to SPCB authorized vendor		
Coating applicator Pad				Disposed to SPCB authorized vendor		
Used Hydro-test Water		Contractor water tanker	Respective Project Contractor	During de watering, care shall be taken to properly dispose the discharging water in order to avoid pollution, damages to fields under cultivation and / or existing structures and interference with the traffic. As chemical have been added to water, dewatering shall be done in such a way that the composition of the effident water does not exceed the limit set in IS 2490 (Part-I) tolerance limits for industrial effluents discharged into in land surface water. Hence, dewatering circuit shall include chlorination before letting the water out of the pipe section to the environment.		
Other Hazardous Waste						
Plastic / other non-biodegradable scrap < 50 micron	GGL Site In-charge through contractor	GGL Store / Warehouse	GGL Warehouse – rep.	Sold to SPCB approved re-cycler	Monthly Patrak	
Used empty paint cans	GGL EIC			Sold to SPCB approved re-cycler	Manifest	
Used batteries	GGL EIC			Sold to dealers having authorisation to collect used batteries	Form-VIII	
E-waste	GGL IT In-charge			Sold to vendors having authorisation for collecting e-waste	Register	
Non- Hazardous Waste						
Project and O&M Waste						
Cotton waste	GGL Site In-charge through contractor	Respective Contractor store	Contractor	Dust bins / garbage container	Challan	
Discarded Grinding Disc		Respective Contractor store		Sold to authorised scrap dealer		
Used Stringer brush				Sold to authorised scrap dealer		
Bevel Protector				Sold to authorised scrap dealer		
Foam Pig				Sold to authorised recycler		
Bentonite Mud used for HDD		Contractor truck		Landfill Site		
Metal Scrap (CS, MS) Pipe, Fittings, Valves	GGL Site In-charge through contractor	GGL Store / Warehouse	GGL Warehouse – rep.	Sold to authorised recycler/scrap dealer		
Other Metallic / Non-metallic scrap e.g. meters, regulators etc.						
Aluminium, Brass, Copper Scrap						
Scrap PE pipe pieces, Fittings, valves						
Non-usable Project surplus – Steel & PE						
Admin Waste						
Canteen Wastes	Admin In-charge through respective Contractor	At designated location in premises	Admin Contractor	Local Authority Waste Management arrangement – e.g. Municipal Corporation waste truck		
Used Plastic Water Bottle						
Waste paper						
Broken glasses						
Electrical bulbs/tube lights etc.	Admin In-charge through respective Contractor	GGL Store / Warehouse	GGL Warehouse – rep.	Sold to authorised recycler/scrap dealer		
Rubber Scrap						
Wooden Scrap						
Office Chairs, Fan, Water Cooler						
Electrical Waste - Motor, Pump, Panel, UPS						EIC through contractor
Other Non-Hazardous waste						
Plastic / other non-biodegradable scrap > 50 micron	Respective Function In-charge	Waste bins / garbage container	-	Local Authority Waste Management arrangement – e.g. Municipal Corporation waste truck		
Housekeeping waste	Contractor		Admin			
Building material (civil) waste	GGL EIC through contractor		Contractor

LIFE SAVER COMPLIANCE

LIFE SAVERS- FOLLOW LIFE SAVER RULES TO AVOID ACCIDENTS

1. Driving

- Plan your journey in advance considering route, duration, road condition and weather condition
- Never drive or allow driving when driver is fatigued or under influence of substances like alcohol, painkillers, anesthetic, recreational drugs etc.
- Ensure vehicle is fit for purpose
- Ensure periodic inspection, servicing and maintenance of vehicles
- Ensure provision of leg guards on two wheelers
- Always wear seatbelt while driving / travelling as passenger or commercial vehicle
- Always wear crash helmet while riding two-wheeler
- Never exceed passenger limit in vehicle nor allow unauthorized person in driver's cabin of hazardous goods vehicle
- Avoid use of two-wheeler / three-wheeler for travel on highways and / or dark roads
- Practice defensive driving - Respond promptly to unsafe act of others on the road
- Obey traffic rules, traffic signs and signals
- Obey speed limits
- Avoid harsh braking and harsh acceleration
- Avoid overtaking on the roads without divider
- Drive in correct lane only
- Reduce speed based on road conditions and at accident prone areas like sharp turn, blind turn, steep curve, narrow bridge, heavy traffic area, road under construction, road diversions, etc.
- Maintain safe distance from the vehicle ahead
- Never use mobile phones or any other communication device while driving
- Keep parking lights ON when parking on highway and use reflective parking triangle to avoid accident
- Look for traffic while getting down from vehicle

2. Safe System of Work (SSoW)

- Before commencement of any job, ensure:
 - Job & site related hazards are identified and appropriate control measures are in place
 - An appropriate emergency/ rescue plan is in place
 - Obtain Permit to Work (PTW) authorization from issuing authority as applicable to the job
- Ensure that approved PTW mentions detailed scope of work, must have clearly identified hazards, associated risks and necessary control measures
- Ensure no personnel is working at worksite without prior intimation and authorization
- Avoid Simultaneous Operations (SIMOPS) which have potential to lead to hazardous situations
- Carry out Tool Box Talk (TBT)
- Provide cautionary instructions about exposure to hazards to people in vicinity of worksite
- Prior to commencing a job on isolated facilities, get confirmed all electrical & mechanical isolations (e.g. Gas installation, Gas pipe section, equipment, etc.) by authorised person and follow Lockout & Tag out (LOTO) system
- Ensure the job is performed by trained & competent personnel
- Ensure safety critical job is being supervised by competent supervisor
- Wear appropriate Personal Protective Equipment (PPE) for the concerned job
- Ensure material, tools and equipment required for performing the job are fit for purpose
- If unsure about job to perform safely, stop the job immediately and discuss with supervisor/ manager
- Intervene and stop unsafe job at site
- For any change in conditions, stop work, reassess the risk and obtain reauthorization as appropriate
- In case of exposure of worksite to road traffic, ensure safety measures like use of flashlight, reflective traffic cones, barricades with reflective stripes to divert the traffic well before the working location/ parked vehicle/equipment etc.
- Do not override or bypass any safety controls without proper authorisation and additional safety measures to mitigate the risk
- Before closing & leaving the site, ensure that site is safe, clear & tidy
- Follow Management of Change (MoC) process for changes to plant/ equipment

3. Excavation, Manual Boring and Horizontal Directional Drilling

3.1 Excavation

- Follow "Safe System of Work" Life Saver rules
- Identify, locate and protect all underground utilities e.g. power cable, gas pipeline, etc. as necessary
- Use insulated crow bar / pick-use for manual excavation
- Identify & mitigate the hazards as necessary e.g. contaminated soil, equipment movement, traffic etc.
- Follow correct trench protection techniques as per soil conditions like step cut (benching) or sloping ("V" shape) or shoring
- Keep machinery and excavated spoil away from edge of trench / pit
- For any change in ground conditions, stop work and consult supervisor
- Keep children away from pit / trench / work sites
- Display warning signs, use appropriate barricades at work area and provide easy means for getting in and out of trench / pit
- Make provision of proper crossover on trench for pedestrian as required

3.2 Manual Boring

- Follow "Safe System of Work" Life Saver rules
- Identify, locate and protect all underground utilities e.g. power cable, gas pipeline, etc. as necessary
- Identify & mitigate the hazards as necessary e.g. contaminated soil, equipment movement, traffic etc.
- Give preference to open cut excavation over manual boring
- Before each manual boring work, ensure:
 - Approved bore plan is in place
 - Entry and exit locations for manual bore are visibly marked
 - Permit to Work (PTW) for the job is in place
- Ensure protection against potential electric shock by:
 - Use of electrical shock resistant (Teflon or equivalent approved insulating material coated) manual boring tool
 - Wearing of rated electrical shock resistant hand gloves and shoes
 - Provision of "Electrical Insulating Rubber Mat" on the ground
 - Avoiding work in wet conditions if electrical power supply is not isolated

3.3 Horizontal Directional Drilling (HDD)

- Follow "Safe System of Work" Life Saver rules
- Identify, locate and protect all underground utilities e.g. power cable, gas pipeline, etc. as necessary
- Before starting HDD operation, ensure:
 - Approved bore plan is in place
 - HDD entry and exit locations are visibly marked
 - Capacity of HDD drilling rig is adequate
 - Proper earthing / grounding of machine
 - Cable strike alarm is in working condition
 - Moving parts of machine are guarded
 - Out rigger of HDD machine is working and rigidly put on stable & firm ground
 - Availability of tracking equipment / device
 - Crane is in good condition
 - Preferably auto rod loading facility is available in the machine
- During drilling operation, do ensure:
 - Track movement of the drilling tool is as per approved bore plan
 - Auto greasing & auto loading of machine rod is functioning properly; in case of manual loading of the machine rod, ensure additional safety measures to mitigate the risk from moving parts
 - Entry of unauthorised personnel in the work area is prohibited
 - No maintenance activity is carried out while HDD machine is in operation

4. Work at Height

- Follow "Safe System of Work" Life Saver rules
- Use only approved and certified equipment e.g. rope access system, scaffold, ladder, etc.
- Give preference to safe working platform in place of rope access system or ladder wherever possible for carrying out work at height job
- Ensure use of rope protectors to avoid any damage to ropes from sharp edges
- Identify 'fall from height' hazard before starting of plumbing job (including plumbing at balconies) and ensure use of safety harness with proper anchoring

LIFE SAVERS- FOLLOW LIFE SAVER RULES TO AVOID ACCIDENTS

5. Lifting Operation

- Follow "Safe System of Work" Life Saver rules
- Ensure that approved lift plan is in place having details of lift method, selected lifting equipment, load chart, sketch showing lifting equipment location & orientation, lifting points & centre of gravity and Load movement path, etc.
- Use only correct, approved and certified lifting equipment, tools & tackles and safety devices
- Work according to a lift plan that is discussed, understood and followed by everyone involved in the job
- Do not exceed safe working load limit
- Ensure lifting equipment are working on stable & firm ground
- Ensure safety measures to avoid contact with overhead power line during lifting operation
- Ensure that lift area is fully protected from road traffic vehicles & movement of other equipment
- Prohibit entry of unauthorised personnel and do not allow anyone under the lifted load or in the lift path
- Ensure operator of lifting equipment and signal man are always in contact
- In case of rough weather conditions, stop the lifting operation and wait till condition is normal

6. Confined Space Entry

- Follow "Safe System of Work" Life Saver rules
- Ensure that all isolations are in place
- Check oxygen level inside confined space and if not adequate, do not enter or be inside confined space
- Check with gas detector and ensure there is no flammable gas inside confined space
- Ensure there is no chemical fume inside confined space
- Ensure the person entering the confined space is carrying portable O₂ analyser with provision for low oxygen alarm
- Monitor the confined space atmosphere at defined intervals to ensure safety of person(s) inside the confined space
- Ensure provision of suitable access & egress
- If required, provide Self-contained Breathing Apparatus (SCBA) or forced ventilation
- Always use buddy system, ensure standby personnel is available and is always in contact with the person(s) in the confined space
- Do not allow unauthorised entry inside confined space
- If rescue needed,
 - Standby personnel (buddy) to stand outside confined space and call for help of rescue team
 - Allow only authorised rescue team member with all necessary Personal Protective Equipment (PPE) to enter inside confined space

7. Electrical

- Follow "Safe System of Work" Life Saver rules
- Ensure isolation of all connected power sources, use of Lockout & Tag out (LOTO) before commencement of electrical job and removal of LOTO after reconnecting the power sources
- Ensure that all concerned persons are informed and updated regarding status of isolation
- Consider all conductors are live unless proved dead with a certified testing instrument
- Ensure earthing of all electrical equipment and use of three pin plug and socket
- Never insert open wires in the socket, always use plug & socket
- All electrical work is to be done by certified electrical person and licensed contractor only
- Use portable electrical equipment with double insulation protection
- Ensure protective devices like ELCB / RCCB are used and in working conditions

8. Compressed Natural Gas (CNG) Handling

- Follow "Safe System of Work" Life Saver rules
- Ensure that CNG cylinder is within test life
- Avoid CNG filling if CNG cylinder is suspected to be spurious / altered / damaged
- Ensure CNG cylinder and CNG cascade are firmly secured
- Ensure flame proof integrity of all electrical installations in hazardous areas
- Secure high pressure hose to avoid swinging action in case of failure
- Control the potential ignition sources (e.g. smoking / naked flame / use of phone / hot work etc.) within CNG handling area
- Control traffic of customer vehicles and movement of passengers / third party within premises
- Carry out periodic risk assessment of the routes used for CNG transport
- Ensure movement of CNG Transport Vehicle on designated path only at CNG station through use of marking and barricades / cones
- Ensure safe reversing of CNG Transport Vehicle with use of reversing camera, parking sensors / guiding staff
- Ensure safe parking of CNG Transport Vehicle with use of wedge lock and parking brake
- Ensure proper grounding of CNG Transport Vehicle and cascade prior to CNG loading / unloading
- Ensure putting the vehicle ignition key in the filling hose before connecting the couplings to avoid hose pull out incident during CNG loading / unloading operation
- Ensure that no passengers are allowed in the CNG filling area or vehicle movement area
- Ensure that vehicle engine is in switched off condition and driver is outside the vehicle before starting CNG filling
- Use insulation pad / rubber mat to avoid contact of CNG filling hose with battery terminals of the vehicle being filled
- Be alert for any gas smell or abnormal sound before and during CNG filling
- Ensure driver does not start the vehicle before disengagement of CNG filling hose by the filler
- Ensure easy access to Emergency stop switches / shut down buttons

9. Liquefied Natural Gas (LNG) Handling

- Follow "Safe System of Work" Life Saver rules
- Follow safety procedure for LNG loading / unloading operations
- Use only non-sparking tools while handling LNG
- Control the potential ignition sources (e.g. smoking / naked flame / use of phone / hot work etc.) within LNG handling area
- Ensure proper grounding of LNG transfer assembly & LNG tanker prior to LNG loading / unloading
- Avoid direct contact with LNG (cryogenic) liquid or vapour
- Wear appropriate PPE (cryogenic gloves, cryogenic suit/apron, face shield, helmet, Safety shoes)
- After LNG loading / unloading is completed, ensure disconnection of hose pipe from LNG tanker
- Do not pour water on LNG spillage or leakage point
- Ensure easy access to Emergency stop switches / shut down buttons

10. Gas Escape Handling

- Follow "Safe System of Work" Life Saver rules
- In case of gas escape inside premises, open doors & windows to ventilate the escaped gas
- Give priority to protecting life
- Always wear appropriate PPE including fire retardant clothing
- Isolate / turn off gas supply as early as possible
- Check for presence of Gas with gas detector, identify gas affected area and if required, evacuate persons to a safe place
- Continuously monitor for presence of gas in atmosphere
- Control the potential ignition sources within Gas affected area / zone e.g. Do not permit smoking / naked flame / use of phone / operation of electrical switches, hot work etc.
- Cordon leak affected area and display warning signs
- Seek help of local authorities as required to keep traffic & people away
- Seek help of fire department and ambulance services as required
- Post leak repair, carry out leak check to ensure soundness of repaired leak as well as ensure there is no other gas leakage in the area

MEDICAL FITNESS CHECK UP MATRIX FOR CONTRACTOR PERSONNELS
